## Screenshots

## Information

Connie Talbot – Over the Rainbow is the start of a competitive and fun karaoke video game series for the Wii, developed by Data Design Interactive and published under their Popcorn Arcade Label.

Over the Rainbow will be distributed either as the software alone, or bundled with a USB Wii compatible microphone. Players will be required to sing along with Connie Talbot tracks in order to score points. Players interact with their Wii via a USB microphone (or the Wii Speak™ accessory) while a music video plays in the background. The pitch players are required to sing is displayed as horizontal bars, which function similar to a musical stave, with corresponding lyrics displayed at the bottom of the screen. The game analyses a player's pitch and compares it to the original track, with players scoring points based on how accurate their singing is.

Over the Rainbow will include a variety of game modes. The standard singing mode allows one or two people to sing simultaneously, either competitively or in a duet. The game will also offer a series of party modes in which the players must pass the Microphone and rate other player's performances.

### Information

Officially recreated under Kawasaki license, Jet Ski offers a level of playability that allows players to easily get into the roll of things. Players can utilise the Wii control system allowing both precision and easy movement of the Jet Ski.

A wide array of impressive tracks from famous location from around the world, including The Thames (London), Taiwanese Islands, Canadian Rookies and the Canals of Venice.

There is really no way one could find this title lacking in the long-term. With the vigorous challenges that await in the Championship mode to the more self-improving challenges of Time Trial, and of course the all out mayhem of the Two-Player mode.

However as impressive as these modes are, Stunt mode is certainly a stand out. Master a wide range of cool tricks available to perfectly control the Jet Ski during air. The sheer level of addictiveness the Wii Remote provides, it is really just all here.

Impressive sound delivering a number of ambient effects as well as the more brutal engine sounds, metal clashes and of course character voices and grunts.

Kawasaki Jet Ski is perfect for the Wii, not only with gameplay, playability and challenge but also showing what the Wii hardware is capable of amassing huge, clean 3D worlds with mind-blowing effects.

This is your chance to be the sporting hero you've always dreamed of - take control of your favourite football team and battle against your footie opponents in some of the wackiest games of 11-a-side action ever!

A fun based sports game, that makes you stand up, move around and literally re-enact the movement of the game their playing.

Use your Wii Remote and Nunchuk to dribble your way through the competition, earning skill points and pull off crazy supermoves to really defeat your opponents in style!

Steer your team triumphantly through a knockout cup, or just go straight in for some quick action in exhibition mode - the choice is yours! The game follows the basic design of the other highly successful Kidz Sports games, utilising the same pick-up-and-play control method.

Will you find your team lifting trophy after trophy? See if you are good enough in Kidz Sports - International Football

## My Personal Golf Trainer with IMG Academies and David Leadbetter

### Information

Rather than just playing a game we have created an exciting new genre in computer sports, the personal trainer.

Sports trainers cost thousands to hire and require tens of thousands for the equipment. Only now with the release of new technology, such as the MotionPlus and Balance Board, has this range of titles been a possibility for home use. This is a ground breaking product, with appeal to game players, sports specialists and the biggest growth area of non-game players. Where Wii-Fit has introduced millions of moms to buy a Wii, every sports player, will see this as a 'must have' product.

For the range we are working with the best of the best in training, to give detailed, useful and accurate individual feedback on everything you need to know to play a better game.

For our first title Golf, the IMG academies with 22 sites around the world, are the largest and best training facilities in the World. While in the game individual direction is given by David Leadbetter who over the past 30 years has published more training manuals than any other golfer in the world. He will personally tell you how to stand, how to move, and how to swing in his famous 7 steps to a better golf swing. You will be shown common mistakes and how to correct them. As a non interactive DVD this information would sell for hundreds of dollars, but utilizing the MotionPlus we can give individual feedback on your own personal swing and then direct you how to correct and improve your shot. Are you are positioned at the right angle, is the club rotated, are you holding it too high or low, forwards or too far behind, with the Balance board David will tell you exactly how you are positioned, leaning to the side or back to far, as you swing we record the speed and direction in 3D space and compare your actions against an ideal swing. This is real golf, with a world class expert available 24/7 in your own home. This will improve your golf swing, on the real course but you can also see your improvement at home as we include a full game of 18 hole golf.

### Comparative Titles:

**Genre : Street Racing**  
**Players : 2**  
**PEGI : 7**

### Information

**Put your key in the ignition and start your engines, it's time for 'Urban Extreme'!**

- 32 unique (playable and unlockable) vehicle designs.
- 16 level choices and Cup challenge modes set in a gritty urban environment.

**Career mode** provides access to the Cup competition, as well as 4 different tracks playable in 3 ways, Standard race, Mirrored and Head to Head. In Career mode spend your hard earned prize money and buy newer more powerful cars. With your winninga enter more expensive and harder races to win bigger rewards.

The **Arcade mode** provides Single Races, Time Trials, Grand Prix and Carnage race challenges. Arcade also allows split screen for two players to compete simultaneously. Split screen multiplayer support with widescreen, and hi res progressive scan modes.

Urban Extreme utilises the Wii Remote to put you right behind the wheel of your favourite supercar and ensures every bump, nudge, crash and crunch rumbles your controller. Precisely tilt the Wii Remote around bends counting for over and under steer. Get a corner wrong, or crash into another vehicle, and you'll hear and feel everything as if your hands were on the wheel itself.

Race against the fastest and craziest drivers from each town to earn prize money. Use your cash to unlock extra vehicles, each with their own strengths and weakness on the road. All of this amounts to a long and entertaining experience that keeps you coming back for more and more.
